Margins to Center presents:

Delivery of siRNA to Cancer Cells using Macrophages as Delivery Vehicles

Monday, November 6th @ 11PM
Whitaker 100

Speaker Dr. Elizabeth Wayne
https://twitter.com/LizWaynePhD

Liz Wayne is a biomedical engineer alumna of Cornell and UPenn who is doing cell-based therapies postdoc at UNC as well as the co-host of the PhDivas podcast. She is a strong advocate for women in science, recognized as a 2017 TED Fellow for her cancer nanotechnology research and efforts to amplify voices of women in leadership and higher education.

At the WashU, she will be talking about her experience in activism in the STEM fields and will discuss how you can become involved as a STEM scholar.
