Looking to gain industry experience this summer?

The WashU BME internship program seeks to prepare our undergraduate students for the broadest employment opportunities in engineering and technology. WashU BME interns will undertake a 10-week internship located in the Greater St. Louis Area.

PRAISE FOR THE INTERNSHIP PROGRAM

Read about last year's program at <https://bit.ly/3FontTI>.

Just keep doing it. **It was very successful** from our point of view and we look forward to participating again next year.

This internship has made me a better engineer by simply **giving me the confidence to feel like an engineer**, reaffirm that I'm on the right track and use what I've learned in my classes.

This is the first time I feel like I'm actually doing engineering, and **it's been valuable to understand the design and quality processes** that engineers utilize.

It took probably a week or two for us to get in the swing of things...By the end of the internship **they were seamless parts of our team**.
